## NATURAL CAT LITTER

### CLUMPING PINE

NO CLAY, NO SILICA, NO FRAGRANCE, NO WORRIES!

- Safe & natural botanical enhancers boost clumping power – without chemicals
- Natural bio-filters control ammonia and solid odors for a fresh, healthy environment
- Clumping Pine texture is low in dust and naturally attractive to cats
- 4 times more absorbent than most clay litters – use less litter and save money
- Perfect litter for single and multi-cat households

# CLUMPING PINE

## Guardian Angel NATURAL CAT LITTER

Congratulations! Your purchase of Guardian Angel Cat Litter shows your commitment to the health of your pets and their environment.

Through our proprietary UHCBS<sup>3</sup> heat treatment process we remove potential allergens and supercharge the absorbency power leaving a naturally effective, highly absorbent litter that is safe for your pets and your family. Our naturally occurring bio-filters control odor by trapping urine and dehydrating solids without added fragrance or dangerous chemicals.

Guardian Angel Clumping Pine Litter is clean, safe and easy to use.

Unlike clumping clay litters, our clumping pine will not stick to the litter box surface or accumulate in paw pads.

With 4 times the absorption power of most clay litters, our clumping pine will reduce your consumption and save you money! So easy to handle, sift and dispose you'll wonder why you didn't try it sooner.

### DIRECTIONS FOR USE:

As with any litter change, gradually add our pine litter into the litter you are currently using. This will allow your pet time to adjust to the change.

Once full adjusted, place 2-3 inches of Guardian Angel Litter in a clean litter box. Remove the urine soaked litter and solids each day and dispose. Add fresh litter as needed.

You will be amazed by Guardian Angel Cat Litter because you'll rarely need to strip the box and refill; but do so at your discretion / as needed.

*A parasite sometimes found in cat feces can cause toxoplasmosis. Pregnant women and those with suppressed immune systems are especially susceptible. Wash hands thoroughly after handling used cat litter. Bag used cat litter for disposal. For overall water quality and wildlife safety, some states consider litter flushing to be illegal. Be sure to consult the laws of your state.*

### INGREDIENTS:

100% Natural Clumping Pine
